\end{aligned}$$

The above doesn't look much like equation (15). So, what do we do? First note that (eq15.116) represents the full R_{ab} , that is, equation (14). To isolate the contributions from ϕ we can first set $\bar{\Gamma}$ and its derivatives to zero (which in turn requires setting $\partial_a \bar{g}_{bc} = 0$). The result is equation (eq15.119) below. Having set $\bar{\Gamma}$ to zero means that we can replace ∂ with \bar{D} leading to equation (eq15.121). But that is clearly a tensor equation and so by the usual arguments it must be true in all frames (not just this frame with $\bar{\Gamma} = 0$). It's a standard argument and I've probably overdone the discussion. Anyway, equation (eq15.121) is exactly equation (15) from the paper. Yeah.

$$R_{ab}^{\phi} = -2 \partial_{a\phi} \phi - 2 \bar{g}_{ab} \partial_{\phi} \partial_{\bar{a}} \bar{g}^{cd} - 2 \bar{g}_{ab} \bar{g}^{cd} \partial_{cd} \phi - 2 \bar{g}^{cd} \partial_{\phi} \partial_{\bar{a}} \bar{g}_{ab} + 4 \partial_{a\phi} \partial_{\bar{b}} \phi - 4 \bar{g}_{ab} \bar{g}^{cd} \partial_{\phi} \partial_{\bar{a}} \phi + 2 \bar{g}_{ac} \partial_{\bar{a}} \phi \partial_{\bar{b}} \bar{g}^{cd} + 2 \bar{g}^{cd} \partial_{\phi} \partial_{\bar{b}} \bar{g}_{ad} \quad (\text{eq15.117})$$

$$= -2 \partial_{a\phi} \phi - 2 \bar{g}_{ab} \partial_{\phi} \partial_{\bar{a}} \bar{g}^{cd} - 2 \bar{g}_{ab} \bar{g}^{cd} \partial_{cd} \phi + 4 \partial_{a\phi} \partial_{\bar{b}} \phi - 4 \bar{g}_{ab} \bar{g}^{cd} \partial_{\phi} \partial_{\bar{a}} \phi + 2 \bar{g}_{ac} \partial_{\bar{a}} \phi \partial_{\bar{b}} \bar{g}^{cd} \quad (\text{eq15.118})$$
